## **IronWare Technologies Announces Multi-Currency Rate Upload for Microsoft Dynamics Solutions**

*Powerful Add-on Utility Provides Automated Upload and Conversion of International  
Currency Rates for Microsoft Accounting Systems*

**DENVER, CO – March 10, 2008** – IronWare Technologies, an award-winning solutions provider, ISV and Gold Certified Partner for Microsoft Business Solutions, today announced the release of their *Multi-Currency Rate Upload* utility for Microsoft Dynamics Business Solutions. A powerful add-on solution designed to automate the conversion of multiple international currency rates to Dynamics accounting systems, *Multi-Currency Rate Upload* enables organizations to easily schedule, verify and apply the latest rates for multiple conversions at numerous daily intervals.

Providing multiple conversion options for both USD-based rates and access to the most complete list of international rates, the *Multi-Currency Rate Upload* from IronWare Technologies automatically populates currency rate maintenance screens within Microsoft Dynamics with the most up-to-date rate information available.

“Having received many requests from customers and partners around the country, voicing their dissatisfaction with available currency rate strategies, IronWare Technologies is excited to release the *Multi-Currency Rate Upload* utility for Microsoft Dynamics,” said Gregory Houston, founder and COO at IronWare Technologies. “The program will be a powerful addition to our family of Microsoft Dynamics add-on solutions and a much anticipated necessity for many of our valued Dynamics customers and partners.”

The *Multi-Currency Rate Upload* utility for Microsoft Dynamics Business Solutions is currently available through the Microsoft Dynamics channel community or direct by contacting IronWare Technologies at [sales.ironware.com](http://sales.ironware.com) or calling 1.877.IRONWARE. Additional details for the *Multi-Currency Rate Upload* utility, as well as the complete family of IronWare Technologies add-on solutions for Microsoft Dynamics can be found at <http://www.ironware.com>.
